Space and Naval Warfare Systems Command Awards Contract

SAN DIEGO — Lockheed Martin, Naval Electronics & Surveillance Systems of Manassas, VA, is being awarded a \$9,492,865 cost plus fixed-fee contract for Fixed Surveillance Systems (FSS) Engineering Support Services. The contractor will design, code, test, distribute, and install FSS software, including corrections to shore-site fielded Fixed Surveillance Systems. In addition, the contractor will also procure and configure hardware suites to support FSS software installations as required. This contract includes options, which if exercised would bring the cumulative value of this contract to \$45,294,972. This contract will be performed in Manassas, VA, (70%) and Fixed Surveillance Systems shore sites around the world (30%) and is expected to be completed by December 2005. Contract funds in the amount of \$950,000 will expire at the end of the current fiscal year. This contract was not competitively procured because the hardware and software used at the shore sites was developed by Lockheed Martin and other no contractors have this maintenance capability. The Space and Naval Warfare Systems Command, San Diego is the contracting activity (N00039-00-C-2260).
